

Pierfelice Menga

AI&&Code Infrastructure Engineer

Career Objective

A professional master of ratification intelligence engineer, having more than 6 years of experience in model, cloud big data integration, AI assistant. Passionate about the database controlling and model development and integration with DB.

“ Highly experienced in writing codes and algorithms as well as building complex neural networks through various programming languages. Possess an unbridled passion for Artificial Intelligence with comprehensive knowledge of machine learning concepts and other related technologies.”

Work History

Senior AI Platform Miner

1. Italy, Brindisi (Remote) | AI Disease Detection Model Developer(January, 2025- Now)

<https://bittensor.ai>

- Developed and optimized AI-powered skin cancer image detection models, achieving top performance and maintaining winning status in Subnet 76 (Safe Scan) for one month
- Built and trained deep learning pipelines for medical image classification and disease detection using large-scale dermatology datasets
- Focused on developing and backtesting multiple disease detection applications to improve model accuracy
- Improved model evaluation and benchmarking processes through continuous experimentation
- Collaborated within decentralized AI network environments to contribute scalable and production-ready healthcare AI solutions

github.com/mandor1428

Education

Oxford University

2017-2022

Language

Experienced in Python, JavaScript, TypeScript, C++, and SQL with expertise in AI development, backend systems, and automation. Skilled in FastAPI, Flask, PyTorch, TensorFlow, OpenAI APIs, Whisper, Docker, Git, and Linux for scalable AI and real-time applications.

2. Italy, Brindisi (Remote) | AI Finance Prediction Model

Developer

<https://bittensor.ai>

- Developed AI-driven financial prediction models for crypto and market trend forecasting using machine learning and algorithmic trading strategies
- Integrated centralized exchange (CEX) APIs including Binance and Coinbase for real-time market data, order execution, and portfolio tracking
- Implemented algorithmic trading systems focused on signal generation, market pattern analysis, and performance optimization

AI&Coding Infrastructure Engineer in Upwork(May, 2022-October, 2025)

1. Italy, Brindisi (Remote) | Trading Bot for Meme Coin

- Developed custom trading logic and integrated the bot with Telegram and a dedicated user interface
- Achieved strong PnL performance through automated trading strategies on Pump.fun

2. Italy, Roma (Remote) | AI Voice Assistant Desktop Application

- Built a cross-platform AI voice assistant for Windows, macOS, and Linux
- Implemented wake-word detection, speech-to-text, and natural voice responses
- Developed modular Python-based intent and automation framework
- Integrated offline caching and local command support for reliability

Language

- ◆ Artificial Intelligence (AI) & Machine Learning (ML)
- ◆ Deep Learning & Neural Networks
- ◆ Natural Language Processing (NLP)
- ◆ Computer Vision & AI Image Processing
- ◆ Predictive Modeling & Data Analysis
- ◆ Algorithmic Trading & Financial Forecasting
- ◆ AI Agent & Voice Assistant Development
- ◆ Python, FastAPI, Flask
- ◆ PyTorch, TensorFlow, Scikit-learn
- ◆ Whisper, Vosk, OpenAI APIs
- ◆ REST API Development & Integration
- ◆ Database Design & Management
- ◆ WebSocket & Real-Time Systems
- ◆ Telegram Bot Development
- ◆ Automation & Backend Engineering
- ◆ Docker, Git, Linux
- ◆ Cloud Deployment & Cross-Platform Applications

Client's Review....

"Ha ricevuto l'input ed ha fatto tutto quasi senza chiedere nulla più ed è arrivato un lavoro perfetto. Non comune. Grande intelligenza, grande capacità di comprensione, grande creatività e grande ordine mentale. Capacità mentale di catalogare le informazioni in un ordine necessario per programmare senza errori. Grande serietà e professionalità."
